Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document:

D1: WO 94/03214

2. Claim 1 does not meet the requirement of Article 33(2) PCT for the following reasons:

D1 discloses a device for absorbing a liquid comprising a liquid reservoir and a porous membrane (see D1: figure 1, (10) and figure 2a, (25)), the reservoir comprising an inlet and containing a porous bulk material (see D1: figure 2a, (20) and (27)). The membrane is hermetically sealed to the reservoir and fluid passing through the inlet must pass across the membrane (see D1: page 15, third paragraph - page 16, second paragraph). Furthermore the membrane has a pore size of from 5 to 30 micrometers (see D1: claim 5).

Therefore the subject-matter of claim 1 is not novel.

3. The technical features of claims 2-11 are either known from D1 or are considered to be merely one of several possibilities which the skilled person would select, in accordance with the circumstances, without the exercise of inventive skill. Consequently these claims do not meet the requirement of Article 33(2)-(3) PCT.
